

LONG-TERM PRESERVATION CABINET

EVER BLUE RANGE

EVER BLUE is an innovative preservation chamber designed to store fresh pre-baked bread for up to 14 days without compromising quality after baking.

It is designed to accommodate 600x800 mm grids (or 2x 400x800 mm).

technical data	
Size of supports	600x800 or 2x 400x600
Number of levels	24
Number of supports per level	1 (ou 2)
Total number of supports	24 (ou 48)
Spacing between levels	63 mm
Adjustable every	21 mm
Support entry direction	600
Level depth	800
Refrigerating capacity at -10°C	1,1 kW
Fluid	R455A
connections	
Electrical supply	220-240V / 1PH+N+T
Frequency	50 Hz
Power	1,3 kW
Rated current	6 A

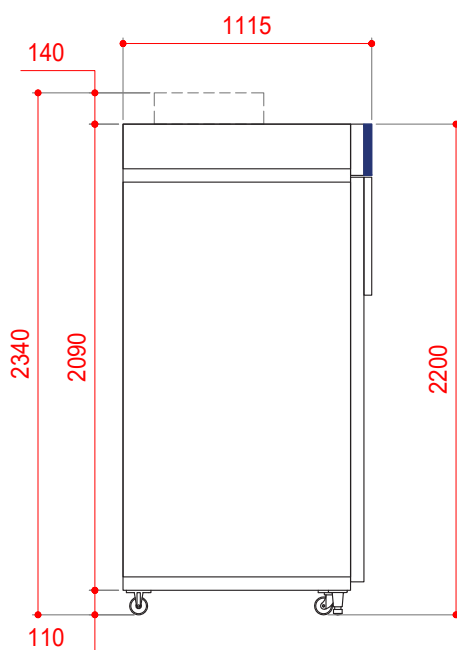

Features

- + Stores pre-baked bread for up to 2 weeks.
- + Storage conditions: 4°C – 99% humidity.
- + Patented cyclic decontamination system based on UV lamps and air ionization.
- + Also allows for slow fermentation of bread dough.
- + Insulated panels made of 42 kg/m³ high-pressure polyurethane foam, 60 mm thick.
- + 304 stainless steel interior lining. Optional brushed 430 stainless steel exterior.
- + Panels assembled using 4 eccentric hooks and centering devices.
- + 5-inch V-Link touchscreen.
- + Independent humidity control system.
- + Evaporator treated with long-lasting anti-corrosion cataphoresis coating.
- + Air distribution duct made entirely of 304 stainless steel.
- + 24 levels of interior slide rails.
- + Black magnetic door seal as standard.
- + Solid door as standard; glass door with blue LED strip available as an option.
- + **Requires careful periodic maintenance to prevent any sources of infection and any risk of contamination.**
